

UNDERSTANDING

Non-Assignment of Dental Benefits

WHAT IS NON-ASSIGNMENT?

You will be responsible to pay 100% of your treatment fees at the time of service, and your dental insurance provider will reimburse the policy holder directly.

HOW DO I USE MY DENTAL PLAN?

We will continue to submit your claim electronically, where possible, for the policy holder to receive reimbursement. If electronic submission is not possible, we will provide you a completed claim form that you can submit to your dental insurance provider.

HOW WILL THIS AFFECT MY TREATMENT?

Our Team will strive to assist you in understanding your treatment options. To provide the best patient care, we recommend treatment based on improving oral health, NOT according to what your insurance plan covers.

We do not have access to your insurance plan. We can provide an estimate for your recommended treatment to your insurance provider. You will be responsible for confirming eligibility under the benefits available in your plan with your insurance provider.
