

Canadian Dental Care Plan

Important Information for Our Patients

Services That May Be Covered - CDCP may help cover common dental services, such as:

- Dental exams & check-ups
- X-rays and diagnostic services
- Cleanings and preventive care
- Fillings and basic restorative treatments
- Extractions and some oral surgery
- Dentures and other treatments (some may require pre-approval)

Coverage is determined by CDCP policies and your oral health needs.

IMPORTANT: FEE GUIDE DIFFERENCES

Dental offices in Ontario typically follow the Ontario Dental Association (ODA) Fee Guide. The CDCP uses its own fee schedule, which may be lower than the standard fees used by dental offices. Because of this difference, a small out-of-pocket cost may apply for some services.

Example: CDCP covered fee: \$150
Dental office fee: \$170

PATIENT PAYS THE \$20 DIFFERENCE

TREATMENT COSTS MAY VARY - Your costs may depend on:

- The type of treatment required
- Your CDCP coverage level
- Fee differences between CDCP and dental office fees
- Services that may not be covered by CDCP

Our team will always review your treatment plan and potential costs with you before treatment.
